

## Stabilizers for Photographic Silver Halide Emulsions: Progress in Chemistry and Application (Paperback)

Filesize: 1.31 MB

### Reviews

*Comprehensive information for book fanatics. it had been writtern really completely and useful. I am happy to explain how this is the greatest publication i have read through in my very own life and can be he finest pdf for ever.*

## STABILIZERS FOR PHOTOGRAPHIC SILVER HALIDE EMULSIONS: PROGRESS IN CHEMISTRY AND APPLICATION (PAPERBACK)

Springer-Verlag New York Inc., United States, 2012. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Stability is one of the most important performances required for silver halide photographic materials. In 1935, Dr. E. I. Birr introduced the concept of the stabilization of photographic emulsions for the first time by inventing a most effective stabilizer, 4-oxo-6-methyl-1,3,3a,7-tetraazaindene (TAI). Dr. Birr's monograph Stabilization of Photographic Silver Halide Emulsions was published in 1974, and accepted as a reliable reference book by many photographic scientists and engineers. Since then, silver halide photographic materials have been greatly improved and expanded through active and continual development of various kinds of technologies. Especially, extensive efforts have been made to develop photographic materials with high sensitivity and rapid processing, which rely upon the stability of photographic emulsions under various conditions. Thus, the concept and technologies of stabilization of photographic silver halide materials have been expanded so extensively that many photographic scientists and engineers eagerly want a reliable, new reference book on the stabilization of photographic emulsions. Dr. Gunther Fischer is one of the most experienced and eminent scientists and engineers in the field of the stabilization of photographic materials with expanded concept. He has been involved in research on the stabilization of photographic emulsions since 1964 when he joined the Technical Scientific Laboratory in the Research and Development Department of the Photo Film Company Agfa Wolfen formerly headed by Dr. Birr, whom he succeeded in that position. I was deeply impressed by his fruitful and elaborate achievements in these fields. Softcover reprint of the original 1st ed. 2004.
