

Yearbook on Space Policy 2007/2008: From Policies to Programmes (Paperback)

Filesize: 5.32 MB

Reviews

This written ebook is fantastic. It is probably the most incredible ebook we have read. Its been written in an extremely basic way in fact it is just following i finished reading this publication where basically modified me, affect the way i think.
(Howell Reichel)

YEARBOOK ON SPACE POLICY 2007/2008: FROM POLICIES TO PROGRAMMES (PAPERBACK)

SPRINGER VERLAG GMBH, Austria, 2014. Paperback. Condition: New. 2009. Language: English . Brand New Book ***** Print on Demand *****.At the time of analysing this second volume of the 'Yearbook on Space Policy' which covers the period mid-2007 to mid-2008, Europe is as visible and strong in the area of space activities as never before. Its space probes are present on the Moon, around Mars, and on Saturn's Moon Titan, and are chasing asteroids and comets; Ariane V is the most successful commercial launch vehicle; and more and more European space applications satellites are in operation. Finally, with the successful launch of the Columbus Orbital Facility (COF) - the most prominent highlight of this period which is also depicted on the cover of this Yearbook - and the first Automated Transfer Vehicle (ATV), Europe has become a decisive player in human spaceflight. This is accompanied by new policy initiatives on the ministerial level which have been bringing the European Space Agency and the European Union steadily closer. Europe's outstanding development and positioning in the space field is based not only on Europe's successful engineering and scientific capabilities and capacities, but also on the forceful political determination of all European actors to maintain and even further their engagement in the use of outer space. And it is this political determination which provides the focus for this 'Yearbook on Space Policy'. The Yearbook describes and analyses the contexts and contents of space policy. Its primary field of investigation is Europe, but it also covers the whole range of global space activities and their influence on European endeavours.
