

Antibiotic susceptibility pattern of selected strains of Staph aureus

By Temidayo Oluyomi, Elufisan / Adeleke, Ezekiel Olufemi

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Plasmid curing response of selected staph aureus strains | This book is title Antibiotic susceptibility pattern of selected strains of Staphylococcus aureus and their response to plasmid curing. It focuses on the possibility of using plasmid curing response behaviour of Staphylococcus aureus in the identification of their possible site of infection. This book take into consideration the possibilities of plasmid of certain characteristics being a product of the same source and hence uses their response to curing for explaining the route of infection of the bacteria from which they were isolated Antibiotic susceptibility pattern of Staphylococcus aureus and their pattern of resistance to drug. Resistant isolates were further tested to know if the basis of resistance was plasmid mediated or chromosomal borne. Strains with Plasmid borne resistance were then cured with a mutagen known as Sodium dodecyl sulphide. Antibigram was then repeated so as to be able to establish the pattern of response to plasmid curing. Staph aureus used in the study were from two possible infectious site which are wound and High Vaginal swab sample | Format: Paperback | Language/Sprache: english | 104 pp.
