## WAVES AND INSTABILITIES

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Propagation of Waves Through Ultrarelativistic Anisotropic Plasma | Starting from the collisionless relativistic Boltzmann equation, the basic equations and the dispersion relations are derived in a strongly magnetized, collisionless, homogenous, ultrarelativistic and anisotropic plasma. The dispersion relation is analysed both analytically and numerically. From the analysis of the solutions of the dispersion relations, it is found that all existing kinds of MHD waves have in the case of ultrarelativistic plasma definitely different...
