

## Quantification of Phosphorus Emissions within Koppl Catchment

Filesize: 8.54 MB

### **Reviews**

*Very helpful to any or all category of folks. It is written in simple phrases rather than difficult to understand. It has been developed in an exceptionally simple way and is particularly just after I finished reading this pdf in which basically transformed me, modify the way in my opinion.*

## QUANTIFICATION OF PHOSPHORUS EMISSIONS WITHIN KOPPL CATCHMENT

To read **Quantification of Phosphorus Emissions within Koppl Catchment** PDF, make sure you refer to the link listed below and save the ebook or have access to other information which are highly relevant to QUANTIFICATION OF PHOSPHORUS EMISSIONS WITHIN KOPPL CATCHMENT book.

Condition: New. Publisher/Verlag: AV Akademikerverlag | A determination of critical source areas through NPS pollution modeling of the Koppl catchment in Austria | The European Water Framework Directive requires the qualification of a good ecological status for water bodies. Lake Mondsee of Austria has repeatedly failed to reach a good ecological status due to phosphorus emissions from non-point source (NPS) pollution. NPS pollution of phosphorus emissions within landscapes dominated by grassland have an effect on water quality. The Agricultural Non-Point Source (AGNPS) pollution modeling program was used to develop a model for determining phosphorus emissions within Koppl catchment. The identification of critical source areas (CSA) through NPS pollution modeling provides data pertaining to landscape regions susceptible to NPS phosphorus emissions. The targeting of CSA through NPS pollution modeling will further aide in the remediation and restoration of watersheds affected by an overabundance of phosphorus loading into open water bodies. The information can be used to help decision support systems in the reduction of phosphorus emissions and identify landscapes more susceptible to the release of greater phosphorus emissions. | Format: Paperback | Language/Sprache: english | 108 pp.
