Createspace Independent Publishing Platform, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.I really do not know what made me think about writing this book. It probably was the fact that one of the major studios was releasing a new movie. The Black Panther. As a little kid, who read comic books and collected them as well. I had always imagined that one day my comic books would come alive. There would be Black super heroes and White Super heroes fighting together on the big screen. I guess that day has arrived. I am not taking anything away from BLADE with Wesley Snipes. However to me that was more of a Vampire kind of movie. I was thinking more along the lines of a super hero that saves the world. As opposed too a vampire thing. None the less. This book is more of a time line or reference points. Showing you as close as I can get too, the actual chronological history of when African/ Black person. First appear in modern comics. Plus I will examine the side-kick factor also. Oh one more thing. It was very hard to separate the racial issues that were prevalent throughout my research. Hopefully this will not take away, from what I am attempting to do. The portrayal of Blacks in comics will always be up for debate. The good, bad and the ugly. Me I am long past all the given stereotypes, basic bullshit and lies! The never ending racial divide. I appreciate the art and some of the great story lines. Do not get me wrong. I am an African American . I however do not hold any hate for the past. Why? because it is exactly that. The past. I think we should move...
