STARTING ELECTRONICS CONSTRUCTION: TECHNIQUES, EQUIPMENT AND PROJECTS (PAPERBACK)

ELSEVIER SCIENCE TECHNOLOGY, United Kingdom, 2005. Paperback. Condition: New. Language: English . Brand New Book. As a step-by-step guide from circuit design to finished product, this practical electronics book actually explains how to select the right tools and components for the job, use a soldering iron, etch a printed circuit board and mount the finished product in a case - and puts skills into practice through simple self-build projects. Whilst most electronics texts focus on theoretical knowledge, Keith Brindley presents a genuinely practical bench guide and reference for electronics experimenters. The straightforward, interactive style of this book makes it ideal for home electronics work and particularly suitable as an introduction to university lab courses for students who are not familiar with hands-on electronics construction. The book also lends itself as a self-contained resource for secondary school and vocational course classroom projects.
