Excerpt from On the Significance of Bovine Tuberculosis and Its Eradication and Prevention in Canada This rise in percentage of tuberculous cattle seen in the slaughter houses at Leipzig from per cent. To per cent. In seven years is veritably appalling, and no other explanation can be afforded than that the disease, in Germany at least, is spreading with terrible rapidity. So much indeed is this the case that competent authorities there are of Opinion that in a few years there will be no breeding herds left unaffected. If, in place of the slaughter-house statistics, we take those afforded by the tuberculin test, the percentage of cases found in animals other than yearlings is yet higher than those afforded by the slaughter-houses. In Germany and Denmark veterinarians have come to the conclusion that the amount of tuberculosis is over 50 per cent. Of all the animals in the land, many large farms being found without a single sound animal. In other words, about half the animals in northern and western Europe would seem to be afflicted with tuberculosis. Corresponding statistics for Britain...
