MAXIMUM-LIKELIHOOD DECONVOLUTION: A JOURNEY INTO MODEL-BASED SIGNAL PROCESSING

Springer. Paperback. Condition: New. 227 pages. Dimensions: 9.0in. x 6.1in. x 0.6in.Convolution is the most important operation that describes the behavior of a linear time-invariant dynamical system. Deconvolution is the unraveling of convolution. It is the inverse problem of generating the systems input from knowledge about the systems output and dynamics. Deconvolution requires a careful balancing of bandwidth and signal-to-noise ratio effects. Maximum-likelihood deconvolution (MLD) is a design procedure that handles both effects. It draws upon ideas from Maximum Likelihood,...

Reviews

Completely among the best ebook I actually have possibly read. It can be rally fascinating throgh reading through period of time. I am very easily can get a pleasure of studying a written ebook.
-- Mr. Antone Rogahn Sr.

Comprehensive information for book fans. It is one of the most amazing book i actually have read. Once you begin to read the book, it is extremely difficult to leave it before concluding.
-- Yoshiko Okuneva

Complete information for publication fanatics. It is actually rally intriguing throgh reading period of time. I am happy to explain how this is actually the greatest publication i actually have read inside my own daily life and may be he finest ebook for possibly.
-- Ms. Heidi Rath
