FBC LTD, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Efficient Implementation of a Shifting Algorithm The improvement is mainly due to a data structure which suggests a succinct representation for subsets of edges, of a given tree. That preserves the interrelation between the edges on the tree. Section 2 introduces both the min-max tree partitioning problem and high-level description of the shifting algorithm which was given in [bps]. Section 3 presents an implementation scheme of the algorithm which. Forms an intermediate-level description of the algorithm Section 4 introduces two data - structures. It is then shown how to utilize them by the intermediate level description to form a low level implementation of the algorithm.
