Heterogenius Classrooms - Behind the Scenes: Detracking Math and Science - A Look at Groupwork in Action

By -

Teachers College Press, United States, 2012. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book. While researchers have documented the promise of detracking reform, many teachers still find it difficult to teach students with a wide range of academic skills in one classroom. Through engaging classroom footage and powerful interviews with teachers, students, and administrators, this book that includes an 80-minute DVD, showcases best practices from successful detracked math and science secondary classrooms. It features lesson plans, student handouts, rubrics, and reflections written by featured teachers in order of their appearance in the film. Chapters include: supports for struggling students, professional development opportunities for teachers, frequently asked questions about the film, and additional resources on detracking reform. In this current high-stakes testing climate, educators must make a decision about how to address the needs of students who are not meeting grade-level expectations. Do they place these students in separate, remedial classes, or do they detrack? This resource shows that detracking more rigor with multiple entry points and support is the socially just and effective alternative to remediation through tracking.

Reviews

This is the greatest book we have read through till now. It is probably the most amazing book we have go through. I am just happy to tell you that here is the greatest book we have read through during my individual daily life and may be he best ebook for possibly.

-- **Eliseo Leffler**

If you need to adding benefit, a must buy book. It usually does not charge excessive. I realized this ebook from my dad and i suggested this publication to learn.
