It results that if 1-8th of the whole metropolitan population - that is persons - were entirely dependent on the other 7-8ths, the sum named would supply to each 17 a head per annum for every man, woman and child, or to every family of five persons 6 85 per annum, and leave to pay the expenses of collection and distribution. Notwithstanding this great expenditure, pauperism and crime are advancing far beyond the relative increase of population.
