Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from A Program Analysis Tool for Evaluating the Ada Compiler Validation Suite The attached figure illustrates the various components of afis: the Features Coverage Facility, the database of primary features (prim) and its interface, the pat tool itself, and the database maps, which holds information as to previous pattern/acvc tests matches. The arrows in the figure indicate the actions taken when a new feature combination needs to matched against the acvc suite. First, the prim database is queried for potentially matching tests, based on the primary features extracted from the pattern. The resulting subset. Of acvc tests is then matched against the pattern, using pat. If any matches are found, that test-name/pattern name pair is stored in maps.
