

Standardisation in Cell and Tissue Engineering: Methods and Protocols (Hardback)

Filesize: 9.16 MB

Reviews

Completely among the best pdf We have at any time study. We have study and i am sure that i am going to likely to read yet again once again in the foreseeable future. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Penelope O'Conner DDS)

STANDARDISATION IN CELL AND TISSUE ENGINEERING: METHODS AND PROTOCOLS (HARDBACK)

To read **Standardisation in Cell and Tissue Engineering: Methods and Protocols (Hardback)** PDF, you should click the web link beneath and download the document or gain access to additional information which are related to STANDARDISATION IN CELL AND TISSUE ENGINEERING: METHODS AND PROTOCOLS (HARDBACK) ebook.

ELSEVIER SCIENCE TECHNOLOGY, United Kingdom, 2013. Hardback. Book Condition: New. 234 x 164 mm. Language: English . Brand New Book. The increased use of biodegradable synthetic or natural scaffolds combined with cells and/or biological molecules, in order to create functional replacement tissue in a damaged tissue site, has led to the need for the development of best practice methods in the area of tissue engineering to help ensure the creation of safe, high quality products. Standardisation in cell and tissue engineering introduces concepts and current practice in the field of cell and tissue engineering to a wide audience and aims to provide awareness of the importance of standardisation in this area while suggesting directions for further investigation. Part one provides an overview of methods for cell and tissue engineering and includes chapters on the fundamentals of cell and matrix biology for tissue engineering, 3D collagen biomatrix development, and control and vascularisation of tissue-engineered constructs. Part two begins with a chapter exploring the methods and protocols of standardisation in cell and tissue engineering before moving on to highlight issues of quality control in cell and tissue engineering, standardised chemical analysis and testing of biomaterials and principles of good laboratory practice (GLP) for in vitro cell culture applications. Standardisation in cell and tissue engineering is a standard reference for leading research groups, government agencies, regulatory bodies, and researchers and technicians at all levels across the whole range of disciplines using cell culture within the pharmaceutical, biotechnology and biomedical industries. * Introduces concepts and current practice in the field of cell and tissue engineering* Highlights the importance of standardisation in cell and tissue engineering and suggests directions for further investigation* Explores methods and protocols of standardisation in cell and tissue engineering and issues of quality control in cell and tissue engineering.
