

A High Level Real-Time Programming Language: October, 1984 (Classic Reprint) (Hardback)

Filesize: 4.08 MB

Reviews

These types of publication is the greatest publication readily available. It is among the most amazing book i have study. Your lifestyle span will be convert as soon as you complete reading this pdf.

(Mrs. Cheyenne Dibbert)

A HIGH LEVEL REAL-TIME PROGRAMMING LANGUAGE: OCTOBER, 1984 (CLASSIC REPRINT) (HARDBACK)

To get **A High Level Real-Time Programming Language: October, 1984 (Classic Reprint) (Hardback)** eBook, make sure you refer to the button listed below and save the document or have access to additional information which might be in conjunction with **A HIGH LEVEL REAL-TIME PROGRAMMING LANGUAGE: OCTOBER, 1984 (CLASSIC REPRINT) (HARDBACK)** ebook.

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from **A High Level Real-Time Programming Language: October, 1984** Introduction We present here an outline of a robot programming language, COAL (CONTinuous Action Language), together with a formal semantics. COAL is designed to support an abstraction of programming which can operate in a continuous fashion. Variables can change values continuously over time, execution can be instantaneously interrupted in response to an event, and so on. Such constructs must be implemented in terms of discrete steps, but COAL expresses the idealization behind the implementation, in the way that real arithmetic is the idealization behind floating point arithmetic. In this paper, we will describe the basic elements of COAL, define a formal semantics, and present a few typical programming examples. We have not yet addressed the question of implementation. 2. Overview of COAL 2.1. Variables: COAL supports at least the following types of variables: booleans, integers, real valued vectors (elements of R^n), continuous functions from R to R (called real functions), and integer semaphores. Certain global variables will be bound to the input and output devices of the particular robotic system. Sensor variables are associated with particular sensors. At each moment in time, the value of the variable is the current measurement of the sensor. Effector variables are associated with parameters of the robot's effectors. Changing the value of the variable causes a motion by the robot. Effector variables must therefore be generally changed continuously. The global variable clock always has the current time as its value. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally...
