Floris Books. Paperback. Book Condition: new. BRAND NEW, Mistletoe Therapy for Cancer: Prevention, Treatment and Healing, Johannes Wilkens, Gert Bohm, Peter Clemm, Mistletoe is a parasitic evergreen plant that lives on trees such apple and elm. Modern complementary therapies for cancer increasingly make use of mistletoe preparations. However, because mistletoe grows on many different trees, the properties of the plant vary according to the host tree. For the first time, this book presents an important reference for practitioners on the characteristics of each type of mistletoe, and what kind of cancers they are best suited to treat. Thirteen host trees are described, covering all aspects from mythology and botany to homeopathy and flower essences. The author then pulls the various characteristics together to provide a unique guide to which patients might benefit most from the different types of mistletoe. The results will be useful not only in treating cancer but also in prevention. The book includes specific case-studies as well as notes on supplementary therapies using metals.
