Univ Europeenne, United States, 2014. Paperback. Condition: New. Language: French . Brand New Book. L'accompagnement du patient constitue un element cle dans l'education therapeutique d'une personne atteinte de maladie chronique. Pourtant, si le concept d'accompagnement souvent retrouve dans la litterature possede de nombreuses definitions, les pratiques correspondantes, sur le terrain des soignants, ont ete tres peu decrites en education therapeutique. L'objectif de cette etude consistait a decrire les pratiques d'accompagnement psychosocial realisees par les soignants. Une approche qualitative exploratoire a ete realisee en 2007 aupres d'une equipe de 7 soignants engages dans l'education therapeutique de 90 enfants atteints de mucoviscidose au CHU de Nantes. Cette recherche a mis en evidence, aupres de cette equipe, la realite d'un accompagnement psychosocial informel majeur lors du suivi individuel des enfants qui correspondait a quatre types de pratiques: des pratiques visant a instaurer une relation de confiance et une communication de qualite; les pratiques de gestion des emotions des patients; celles d'anticipation des problemes; et les pratiques de resolution des problemes psychosociaux amenes par les patients.
