Blue Water Ditching: Training Professional Crewmembers for the Unthinkable Disaster

By Capt Dave Montgomery

Createspace, United States, 2012. Paperback. Book Condition: New. 201 x 132 mm. Language: English . Brand New Book ***** Print on Demand *****.Professional pilots have a doctorate level of knowledge surrounding aviation. They spend years learning all aspects of aviation from federal regulations, international regulations, communication procedures, emergency procedures, instrument procedures, flight manuals, company manuals, operating procedures, and finally techniques on how to do their job. However there is an emergency procedure which is trained around (crew members learn the beginning, and the end), but very seldom spend time dealing with the real time exercise of what is going to happen in a ditching. All crew members learn how to secure a bad engine. Or handle an electrical malfunction. Or control bleed air in a pneumatics problem. They also train how to exit the aircraft in the water in case of a water landing. And how to climb into rafts and in some cases how to climb into a basket for a helicopter pickup. But few crew members have ever worked through the scenario of engine failure at altitude to water contact. This book begins with the concept that no pilot is too experienced, or too old to learn a...

Reviews

Great electronic book and valuable one. It really is simplistic but surprises within the fifty percent from the book. Its been printed in an extremely simple way in fact it is merely right after i finished reading this publication by which in fact modified me, change the way i really believe.

-- **Dr. Bethany Lindgren**

A high quality ebook along with the font employed was fascinating to read. It really is writer in easy phrases rather than confusing. I am just easily can get a satisfaction of looking at a composed publication.
