What You Will Learn * Set up Eclipse, Tomcat, and Glassfish server for JEE application development * Use JSP, Servlet, JSF, and EJBs to create a user interface and write business logic * Create JEE database applications using JDBC and JPA * Handle asynchronous messages using MDBs for better scalability * Deploy and debug JEE applications and create SOAP and REST web services * Write unit tests and calculate code coverage * Troubleshoot application performance and memory issues In Detail Java EE is a technology for developing enterprise class, scalable applications. With recent changes to Java EE specifications, JEE application development has become a lot simpler. However, recent changes have also added many new specifications, some of which compete with existing JEE specification. Along with JEE specifications and APIs, it is also very important to understand the entire application development process and tools that can help simplify and accelerate JEE application development. This guide provides a complete overview of developing JEE applications using Eclipse. The many features of the Eclipse IDE...
