

The Digital Handshake: Connecting Internet Backbones

By Federal Communications Commission

Createspace, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.This book examines the interconnection arrangements that enable Internet users to communicate with one another from computers that are next door or on the other side of the globe. The Internet is a network of networks, owned and operated by different companies, including Internet backbone providers. In order to provide end users with universal connectivity, Internet backbones must interconnect with one another to exchange traffic destined for each other s end users. Internet backbone providers are not governed by any industry-specific interconnection regulations, unlike other providers of network services; instead, each backbone provider bases its decisions on whether, how, and where to interconnect by weighing the benefits and costs of each interconnection. Interconnection agreements between Internet backbone providers are reached through commercial negotiations in a handshake environment. Internet backbones interconnect under two different arrangements: peering or transit. In a peering arrangement, backbones agree to exchange traffic with each other at no cost. The backbones only exchange traffic that is destined for each other s end users, not the end users of a third party. In a transit arrangement,...

Reviews

This publication will never be straightforward to get going on looking at but really fun to see. This can be for all those who statte that there had not been a worth looking at. You wont really feel monotony at at any moment of your own time (that's what catalogs are for about should you request me).
