Applied Linear and Non-Linear Fractal interpolating Functions

By Rammahi, Adil Al-

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | This book suitable for students and researchers who interested with the concepts of fractals and its applications. The subjects are involved the interpolations and approximations via linear and nonlinear interpolating functions. A comparison between fractals interpolating technique and numerical interpolating methods are studied for testing the optimal method. Classical geometry defines basic shapes such as points, lines and circles. Much of the universe around us can be explained and understood using those classical constructions. However, there are many objects in nature that cannot be represented with these simple shapes. For example, a mountain is not just a cone. There are smaller peaks and valleys of all sizes on the surface of the mountain that make it distinctly different from any simple shape. The shape of a mountain and other natural objects can be described through something called a fractal. Although there is a specific mathematical definition of fractals, for this purposes one can assume that a fractal is any object that exhibits self-similarity. Self similarity means that any small part of the object always looks like a small copy of the whole object. | Format: Paperback | Language/Sprache: english | 100 pp.

Reviews

Thorough manual! Its this kind of excellent study. It really is written in straightforward terms and never difficult to understand. I am very happy to inform you that this is basically the very best pdf we have read through during my individual existence and could be the greatest ebook for possibly.

-- **Dr. Arno Sauer Sr.**

Here is the greatest pdf i have got read through till now. It typically will not charge excessive. You wont really feel monotony at anytime of the time (that's what catalogs are for concerning when you question me).
