# Julia Programming for Operations Research: A Primer on Computing (Paperback)

Filesize: 1.75 MB

## Reviews

This composed ebook is wonderful. I could comprehended almost everything out of this composed e ebook. You may like just how the blogger publish this ebook.

# JULIA PROGRAMMING FOR OPERATIONS RESEARCH: A PRIMER ON COMPUTING (PAPERBACK)

To save **Julia Programming for Operations Research: A Primer on Computing (Paperback)** PDF, you should follow the web link listed below and save the file or have accessibility to other information which might be related to JULIA PROGRAMMING FOR OPERATIONS RESEARCH: A PRIMER ON COMPUTING (PAPERBACK) ebook.

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Updated. Language: English . Brand New Book ***** Print on Demand *****.Last Updated: November 2016 The main motivation of writing this book was to help the author himself. He is a professor in the field of operations research, and his daily activities involve building models of mathematical optimization, developing algorithms for solving the problems, implementing those algorithms using computer programming languages, experimenting with data, etc. Three languages are involved: human language, mathematical language, and computer language. His team of students need to go over three different languages, which requires translation among the three languages. As this book was written to teach his research group how to translate, this book will also be useful for anyone who needs to learn how to translate in a similar situation. The Julia Language is as fast as C, as convenient as MATLAB, and as general as Python with a flexible algebraic modeling language for mathematical optimization problems. With the great support from Julia developers, especially the developers of the JuMP--Julia for Mathematical Programming--package, Julia makes a perfect tool for students and professionals in operations research and related areas such as industrial engineering, management science, transportation engineering, economics, and regional science.
