Pages Number: 181 Publisher: People's Health Publishing House Pub. Date :2003-8-25. Emergency Nursing is the study of various types of acute, acute trauma, acute exacerbation of chronic diseases such as emergency care of critically ill patients with a clinical nursing courses. With the development of emergency medicine and a variety of instruments and equipment constantly updated, the scope of emergency nursing is also widening. The program's mission is to help healthcare professionals to learn the basics of emergency care and basic skills, and applies them to the practice of emergency care, to develop corresponding meet the social needs of the clinical emergency care professionals and lay a good foundation. In order to meet the needs of academic development and social improvement, the Office of the Ministry of Health and the Ministry of Health teaching materials nursing assessment committee in December 2002 to determine the Emergency Nursing for the 14 national medical institutions of higher nursing profession. Ben materials one. The materials to specialist knowledge as a starting point to reach the level of undergraduate education, in knowledge-based systematic, while taking into account the convergence of knowledge. Undergraduate student aid based on clinical experience and an understanding of common first aid knowledge, but still lack some features, and more focus on helping students develop comprehensive rescue capabilities: monitoring the various branches of knowledge and technology were placed in common acute first aid knowledge to explain, make the students understand memory; the integration of common first aid techniques in the specific emergency rescue; common types of emergency and acute abdomen, write more and used to identify internal and external, gynecological acute abdomen written horizontally, so that students improved in comparison with...
