

The Mathematics of Games of Strategy: Theory and Applications

By Melvin Dresher

Dover Publications Inc., United States, 1982. Paperback. Book Condition: New. 211 x 137 mm. Language: English . Brand New Book. This is a book about decision making in the absence of perfect information. In particular, it analyzes decision problems in a competitive environment where conflicting interests exist, and uncertainties and risk are involved. For the reader who is interested in the applications of the theory of games of strategy to military, economic, or political problems, or to decision making in business, operations research, or the behavior sciences, it will prove a most rewarding study.

Reviews

Good electronic book and valuable one. It is one of the most incredible publication we have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.
