Excerpt from An Overview of Floor Slip-Resistance Research With Annotated Bibliography Slips and falls in the home as well as in public buildings have reached serious proportions accidents per year in the home, resulting in deaths and disabling injuries). This paper reviews the literature relating to this problem. Based on studies of kinesiology and anthropometry, the coefficient of friction between foot surfaces and floor surfaces is found to be a significant parameter controlling slips and falls. A review of the general study of friction and a critical appraisal of methods for determining the coefficient of friction on slip - resistance of floors leads to a guide for selection of slip - resistance criteria. The paper concludes with a discussion of the legal aspects of the problem and the present status of slip - resistance specifications. Key words: Building safety; floor surface friction; occupancy safety; slip - resistance; slip - resistance testers; walking friction.
