Excerpt: .Ozena is a condition difficult of treatment by light and readily and effectively treated by the direct static and high frequency currents with vacuum tube electrodes, but some writers have reported favorable results from the use of light reflected into the throat and nasal cavities. Diosurio f reports 16 cases of ozena under treatment with incandescent light reflected into the nose and by introducing a water-jacketed lamp in the nose or a larger lamp in the mouth. In every case he reports a noteworthy decrease of the waste and secretion, and a disappearance of the characteristic fetor. Cleaves suggests the use of the arc light in treating the nasal, anal, and buccal cavities; with it a profounder influence is obtained, involving greater tissue reaction, when topically applied, by reaction of the complex chemical frequencies. Post-Operative employment of incandescent light is one of the niceties...
