Excerpt from Oral Arithmetic by Grades, Vol. 2: Designed for the Use of Classes in the Fifth, Sixth, and Seventh Years of the Public School Course A celebrated French philosopher gave utterance to the following as summing up the requirements for successful living: A man, said he, should know, first, where he is; second, where he is going; and third, how to get there. A like suggestive principle applies to all effort towards mathematical acquisition. It is the movement from the known to the unknown, by means of the relations subsisting between them, which constitutes always and at all times intelligent action. It is the special distinction of Oral Arithmetic, that, in its application, the pupil moves by an irresistible momentum of logic to a rational judgment, whether the burden of proof be one of reductio ad absurdum, or whether it be along direct lines of demonstration. In the solution of arithmetical problems, this principle appeals for constant recognition, if the pupil would gain that intellectual power which, under the direction of a trained mind, will enable him to discuss...
