It must grow, not merely in volume, but in its fundamental values, in the breadth and the depth of its philosophical concepts, in the thoroughness of its practice, in the validity and trustworthiness of its conclusions. And so it seems that this is a peculiarly fitting time at which to attempt such a critique of systematic entomology as is here presented. 103 3 I wish here to acknowledge my indebtedness to various colleagues who have assisted in the preparation of this volume. Mr. J. C. Chamberlin has permitted me to draw freely from an unpublished manuscript dealing with the matter of generic concepts and has discussed with me many of the ideas that are here presented. Professors E. O. Essig, S. B. Freeborn, and E. C. VanDyke, of the University of California, have read parts of my manuscript and have offered suggestions and criticisms that have been of very decided aid, especially in those things in which they have disagreed with my views.
