

## Arithmetic on Modular Curves

By Stevens, Glenn

Book Condition: New. Publisher/Verlag: Springer, Basel | One of the most intriguing problems of modern number theory is to relate the arithmetic of abelian varieties to the special values of associated L-functions. A very precise conjecture has been formulated for elliptic curves by Birch and Swinnerton-Dyer and generalized to abelian varieties by Tate. The numerical evidence is quite encouraging. A weakened form of the conjectures has been verified for CM elliptic curves by Coates and Wiles, and recently strengthened by K. Rubin. But a general proof of the conjectures seems still to be a long way off. A few years ago, B. Mazur [26] proved a weak analog of these conjectures. Let  $N$  be prime, and be a weight two newform for  $\Gamma_0(N)$ . For a primitive Dirichlet character  $\chi$  of conductor prime to  $N$ , let  $a_f(\chi)$  denote the algebraic part of  $L(f, \chi, 1)$  (see below). Mazur showed in [26] that the residue class of  $a_f(\chi)$  modulo the "Eisenstein" ideal gives information about the arithmetic of  $X_0(N)$ . There are two aspects to his work: congruence formulae for the values  $a_f(\chi)$ , and a descent argument. Mazur's congruence formulae were...

### Reviews

*Absolutely among the finest pdf I have got possibly read. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Prof. Lois Cormier II**

*Completely essential read through book. It normally is not going to charge an excessive amount of. I found out this book from my dad and i advised this pdf to find out.*
